Section I. In Memory of Linas Kilius

Linas Rimgaudas Kilius (1949–1996)
A.E. Litherland 1
Ion source design criteria for AMS
L.R. Kilius, W.E. Kieser, A.E. Litherland, X.-L. Zhao, J.C. Rucklidge and R.P. Beukens 5
Molecular fragment problems in heavy element AMS
L.R. Kilius, X.-L. Zhao, A.E. Litherland and K.H. Purser 10
Neutral injection for AMS
A.E. Litherland and L.R. Kilius 18

Section II. Reports from new AMS Facilities

The Leibniz-Labor AMS facility at the Christian-Albrechts University, Kiel, Germany
M.-J. Nadeau, M. Schleicher, P.M. Grootes, H. Erlenkeuser, A. Gottdang, D.J.W. Mous, J.M. Sarnthein and H. Willkomm 22
The AMS facility at the National Institute for Environmental Studies (NIES), Japan
H. Kume, Y. Shibata, A. Tanaka, M. Yoneda, Y. Kumamoto, T. Uehiro and M. Morita 31
Brazilian accelerator mass spectrometry program
G.M. Santos, J.C. Acquadro, R.M. Anjos, P.R.S. Gomes, C. Tenreiro, R. Liguori Neto, M.M. Coimbra, C.R. Appoloni, A.M.M. Maciel, N.H. Medina, M.A. Rizzuto and N. Carlin Filho 34
The AMS program at the TANDAR accelerator
D.E. Alvarez, J.O.F. Niello, M. di Tada, A.M.J. Ferrero, G.V. Martí, O.A. Capurro, A.J. Pacheco, J.E. Testoni, D. Abriola, A. Etchegoyen, E. Achterberg and M. Ramírez 39
Accelerator mass spectrometry at the Kyoto University tandem accelerator
M. Nakamura, Y. Tazawa, H. Matsumoto, M. Hirose, K. Ogino, M. Kohno and J. Funaba 43
VERA: A new AMS facility in Vienna
W. Kutschera, P. Collon, H. Friedmann, R. Golser, P. Hille, A. Priller, W. Rom, P. Steier, S. Tagesen, A. Wallner, E. Wild and G. Winkler 47

Section III. Reports from existing AMS Facilities

Status of the NSF-Arizona AMS laboratory
D.J. Donahue, J.W. Beck, D. Biddulph, G.S. Burr, C. Courtney, P.E. Damon, A.L. Hatheway, L. Hewitt, A.J.T. Jull, T. Lange, N. Lifton, R. Maddock, L.R. McHargue, J.M. O'Malley and L.J. Toolin 51
The LLNL AMS facility
M.L. Roberts, G.S. Bench, T.A. Brown, M.W. Caffee, R.C. Finkel, S.P.H.T. Freeman, L.J. Hainsworth, M. Kashgarian, J.E. McAninch, I.D. Proctor, J.R. Southon and J.S. Vogel 57
Status report of the PSI/ETH AMS facility
H.-A. Synal, G. Bonani, M. Döbeli, R.M. Ender, P. Gartenmann, P.W. Kubik, Ch. Schnabel and M. Suter 62

0168-583X/97/$17.00 © 1997 Elsevier Science B.V. All rights reserved

Status and plans for the PRIME Lab AMS facility
D. Elmore, X. Ma, T. Miller, K. Mueller, M. Perry, F. Rickey, P. Sharma, P. Simms, M. Lipschutz and S. Vogt 69

Research and measurement program at the ANTARES AMS facility
C. Tuniz, D. Fink, M.A.C. Hotchkis, G.E. Jacobsen, E.M. Lawson, A.M. Smith and Q. Hua 73

Development plans for the AMS facility at the Institute of Geological and Nuclear Sciences, New Zealand
A. Zondervan and R.J. Sparks 79

Improvements to the PKUAMS injection system
Lu Xiangyang, Li Kun, Zhao Qiang, Li Bin, Liu Kexin, Guo Zhiyu, Wang Jianjun and Yuan Jinglin . 84

The Groningen AMS tandetron
S. Wijma and J. van der Plicht 87

The Erlangen AMS facility: status report and research program
W. Kretschmer, G. Anton, M. Bergmann, E. Finckh, B. Kowalzik, M. Klein, M. Leigart, S. Merz, G. Morgenroth and I. Piringer 93

Precision and mass fractionation in ^{14}C analysis with AMS
K. van der Borg, C. Alderliesten, A.F.M. de Jong, A. van den Brink, A.P. de Haas, H.J.H. Kersemaekers and J.E.M.J. Raaymakers 97

Status of the SINR mini-cyclotron AMS facility
M. Chen, X. Lu, G. Chen, S. Xu, L. Shen, D. Li, Y. Zhang, P. Gong, Y. Zhang and W. Zhou 102

Current status of the AMS system at the University of Tokyo
K. Kobayashi, S. Hatori, H. Nagai, K. Yoshida, M. Imamura, H. Matsuzaki, M. Murayama, M. Sakamoto, Y. Aramaki, M. Tanikawa, S. Shibata, H. Ohashi, U. Zoppi, C. Nakano, Y. Sunohara and T. Saitoh. 107

Section IV. New instrumentation, methods and applications

Microbeam AMS: prospects of new geological applications
S.H. Sie, T.R. Niklaus and G.F. Suter 112

Measurement of ^{81}Kr in the atmosphere
P. Collon, T. Antaya, B. Davids, M. Fauerbach, R. Harkewicz, M. Hellstrom, W. Kutschera, D. Morrissey, R. Pardo, M. Paul, B. Sherrill and M. Steiner 122

AMS at the Munich gas-filled analyzing magnet system GAMS
K. Knie, T. Faestermann and G. Korschinek 128

^{60}Fe measurements with an EN tandem accelerator
P. Gartenmann, C. Schnabel, M. Suter and H.-A. Synal. 132

Measurement of ^{63}Ni and ^{59}Ni by accelerator mass spectrometry using characteristic projectile X-rays
J.E. McAninch, L.J. Hainsworth, A.A. Marchetti, M.R. Leivers, P.R. Jones, A.E. Dunlop, R. Mauthe, J.S. Vogel, I.D. Proctor and T. Straume 137

The Chalk River AMS time-of-flight detection system
V.T. Koslowsky, H.R. Andrews, W.G. Davies and K. Murnaghan 144

AMS of ^{14}C at low energies
M. Suter, St. Jacob and H.A. Synal 148

Design of a compact 1 MV AMS system for biomedical research
B.J. Hughey, R.E. Klinkowstein, R.E. Shefer, P.L. Skipper, S.R. Tannenbaum and J.S. Wishnok. . . . 153

A compact ^{14}C Isotope Ratio Mass Spectrometer for biomedical applications
D.J.W. Mous, K.H. Purser, W. Fokker, R. van den Broek and R.B. Koopmans 159

The novel HVEE multi-element AMS system
A. Gottdang and D.J.W. Mous. 163

AMS detection of chlorine-36 using small tandems
K.H. Purser 167

New detector concepts for AMS
R. Golser, H. Friedmann, A. Priller, P. Steier, W. Kutschera, O. Benka and E. Steinbauer 170

Development of a gas ΔE-position sensitive E detector for AMS studies
N. Funaya, T. Baba, N. Miyazaki, T. Takahashi, T. Kaikura, R. Seki, K. Furuno, S. Jiang and Y. Nagashima 174

Reducing the magnet switching time for AMS at PRIME Lab
M. Perry, D. Elmore, F. Rickey, B. Bhukhanwala and E. Chong 178

Detection of ^{41}Ca with a $^{7}Li^{37}Cl$ molecular pilot beam
T. Baba, N. Funaya, N. Miyazaki, T. Takahashi, T. Kaikura, R. Seki, S. Sueno, S. Jiang and Y. Nagashima 183

Experimental investigation of the destruction of 1 MeV $^{12}CH_2$ molecules in single and double stripping foils
B.J. Hughey, R.E. Shefer, R.E. Klinkowstein, X.L. Zhao, W.E. Kieser and A.E. Litherland 186

Section V. Performance reports and project summaries from different facilities

First performance tests of VERA
A. Priller, R. Golser, P. Hille, W. Kutschera, W. Rom, P. Steier, A. Wallner and E. Wild 193

The PRIME Lab external research program
P. Sharma, D. Elmore and S. Vogt 199

The new Chalk River AMS ion source, sample changer and external sample magazine
V.T. Koslowsky, N. Bray, Y. Imahori, H.R. Andrews and W.G. Davies 203

Section VI. AMS sample and target preparation chemistry

Corrections for contamination background in AMS ^{14}C measurements
T.A. Brown and J.R. Southon 208

Radiocarbon dating organic residues at the microgram level
D.L. Kirner, R. Burky, R.E. Taylor and J.R. Southon 214

Enrichment of sub-milligram size carbon samples
H. Kitagawa and J. van der Plicht 218

AMS sample handling in Groningen
A.Th. Aerts-Bijma, H.A.J. Meijer and J. van der Plicht 221

The reduction of sample memory effects in the Chalk River AMS ion source
V.T. Koslowsky, H.R. Andrews, W.G. Davies, Y. Imahori and M. Bolusmjak 226

Ultra-separation of nickel from copper metal for the measurement of ^{63}Ni by AMS
A.A. Marchetti, L.J. Hainsworth, J.E. McAninch, M.R. Leivers, P.R. Jones, I.D. Proctor and T. Straume 230

The chemical behavior of Be, Al, Fe, Ca and Mg during AMS target preparation from terrestrial silicates modeled with chemical speciation calculations
M. Ochs and S. Ivy-Ochs 235

Section VII. Biomedical applications of AMS

Elements in biological AMS
J.S. Vogel, J. McAninch and S.P.H.T. Freeman 241

A programme for long-term retention studies of ^{14}C-labelled compounds in man using the Lund AMS facility
K. Stenström, S. Leide-Svegborn, B. Erlandsson, R. Hellborg, G. Skog, S. Mattsson, L.-E. Nilsson and B. Nosslin 245

^{36}Cl and ^{129}I in teeth and bones
R.J. Cornett, L. Chant, H.R. Andrews, W.G. Davies, B.F. Greiner, Y. Imahori, V.T. Koslowsky, T. Kotzer, J.C.D. Milton and G.M. Milton 249

The influence of dissolved silicate on the physiological chemistry of aluminium, studied in humans using tracer ^{26}Al and accelerator mass spectrometry
S.J. King, J.P. Day, C. Oldham, J.F. Popplewell, P. Ackrill, P.B. Moore, G.A. Taylor, J.A. Edwardson, L.K. Fifield, K. Liu and R.G. Cresswell 254

Investigations of the human aluminium biokinetics with ^{26}Al and AMS
G. Kislinger, C. Steinhausen, M. Alvarez-Brückmann, C. Winklhofer, T.-H. Ittel and E. Nolte 259
Human calcium metabolism including bone resorption measured with ^{41}Ca tracer
S.P.H.T. Freeman, J.C. King, N.E. Vieira, L.R. Woodhouse and A.L. Yergey 266
High resolution AMS imaging of radiocarbon in biomedical applications
Z.X. Jiang, C. Bronk Ramsey, R.E.M. Hedges, P. Somogyi, J.D.B. Roberts and A. Cowey 271
AMS measurements to study uptake and distribution of ^{26}Al in mice and the role of the transferrin receptor in aluminium absorption mechanisms
J. Barker, J. Templar, S.J. King, J.P. Day, M.W.B. Bradbury, A. Radunovic, F. Ueda, K. Raja, J.S. Lilley and P.V. Drumm 275
^{26}Al uptake and accumulation in the rat brain
S. Yumoto, H. Nagai, M. Imamura, H. Matsuzaki, K. Hayashi, A. Masuda, H. Kumazawa, H. Ohashi and K. Kobayashi 279
Measurements of aluminum transport in wheat at the cellular level
R.R. Johnson, A.D.M. Glass, H. Kronzucker, Z. Gelbart, E. Venczel, M. Paul, D. Berkovits, A. Catan, Y. Kashiv and S. Ghelberg 283

Section VIII. Cosmogenic nuclides in dust, ice and sediments

Identification of bomb-produced chlorine-36 in mid-latitude glacial ice of North America
L. DeWayne Cecil and S. Vogt 287
Measurements of the $^{14}CO_2$ bomb pulse in firn and ice at Law Dome, Antarctica
V.A. Levchenko, D.M. Etheridge, R.J. Francey, C. Trudinger, C. Tuniz, E.M. Lawson, A.M. Smith, G.E. Jacobsen, Q. Hua, M.A.C. Hotchkis, D. Fink, V. Morgan and J. Head 290
^{10}Be and dust
S. Baumgartner, J. Beer, G. Wagner, P. Kubik, M. Suter, G.M. Raisbeck and F. Yiou 296
A long-term variation of ^{10}Be flux changes at ODP Site 925 on the Ceara Rise in the equatorial Atlantic
M. Murayama, H. Nagai, M. Imamura, S. Hatori, K. Kobayashi and A. Taira 302
^{10}Be investigations of sediments, soils and loess at GNS
I.J. Graham, R.G. Ditchburn, R.J. Sparks and N.E. Whitehead 307
New interpretation of the ^{10}Be and ^{26}Al content in cosmic spherules
U. Zoppi, H. Matsuzaki, K. Kobayashi, M. Imamura, H. Nagai, S. Hatori, C. Nakano and Y. Sunohara. 319

Section IX. Isotopes, production rates and cross sections

Measurement of proton production cross sections of ^{10}Be and ^{26}Al from elements found in lunar rocks
J.M. Sisterson, K. Kim, A. Beverding, P.A.J. Englert, M. Caffee, A.J.T. Jull, D.J. Donahue, L. McHargue, C. Castaneda, J. Vincent and R.C. Reedy 324
Measurements of proton-induced production cross sections for ^{36}Cl from Ca and K
M. Imamura, K. Nishiizumi, M.W. Caffee and S. Shibata 330
Cosmogenic chlorine-36 production in K-feldspar
J.M. Evans, J.O.H. Stone, L.K. Fifield and R.G. Cresswell. 334
In-situ production of radionuclides at great depths
B. Heisinger, M. Niedermayer, F.J. Hartmann, G. Korschinek, E. Nolte, G. Morteani, S. Neumaier, C. Petitjean, P. Kubik, A. Synal and S. Ivy-Ochs 341

Section X. ^{129}I and ^{36}Cl applications of AMS

The ^{129}I AMS program at PRIME Lab
P. Sharma, D. Elmore, T. Miller and S. Vogt 347
Determination of total iodine and sample preparation for AMS measurement of ^{129}I in environmental matrices
A.A. Marchetti, F. Gu, R. Robl and T. Straume 352

Oil formation and fluid convection in Railroad Valley, NV: a study using cosmogenic isotopes to determine the onset of hydrocarbon migration
X. Liu, U. Fehn and R.T.D. Teng 356
The distribution of ^{129}I around West Valley, an inactive nuclear fuel reprocessing facility in Western New York
U. Rao and U. Fehn 361
^{129}I interlaboratory comparison
M.L. Roberts, M.W. Caffee and I.D. Proctor 367
Cl 36 — A potential paleodating tool
G.M. Milton, S.J. Kramer, T.G. Kotzer, J.C.D. Milton, H.R. Andrews, L.A. Chant, R.J. Cornett, W.G. Davies, B.F. Greiner, Y. Imahori, V.T. Koslowsky and J.W. McKay 371
Is ^{36}Cl from weapons' test fallout still cycling in the atmosphere?
R.J. Cornett, H.R. Andrews, L.A. Chant, W.G. Davies, B.F. Greiner, Y. Imahori, V.T. Koslowsky, T. Kotzer, J.C.D. Milton and G.M. Milton 378
A new interpretation of the distribution of bomb-produced chlorine-36 in the environment, with special reference to the Laurentian Great Lakes
J.C.D. Milton, G.M. Milton, H.R. Andrews, L.A. Chant, R.J.J. Cornett, W.G. Davies, B.F. Greiner, Y. Imahori, V.T. Koslowsky, T. Kotzer, S.J. Kramer and J.W. McKay 382
Use of chlorine-36 as tracer for the evolution of waters in geothermal and tectonically active areas in Western Turkey
W. Balderer and H.-A. Synal 387

Section XI. Some applications of AMS to different isotopes

Environmental ^{90}Sr measurements
M. Paul, D. Berkovits, L.D. Cecil, H. Feldstein, A. Hershkowitz, Y. Kashiv and S. Vogt 394
Accelerator mass spectrometry of the planetary elements
L.K. Fifield, A.P. Clacher, K. Morris, S.J. King, R.G. Cresswell, J.P. Day and F.R. Livens 400
Determination of the half-life of ^{79}Se with the accelerator mass spectrometry technique
Jiang Songsheng, Guo Jingru, Jiang Shan, Li Chunsheng, Cui Anzhi, He Ming, Wu Shaoyong and Li Shilin 405
Tritium depth profiling in carbon by accelerator mass spectrometry
M. Friedrich, G. Sun, R. Grötzschel, R. Behrisch, C. García-Rosales and M.L. Roberts 410
Evidence for anomalous ^{107}Ag and ^{109}Ag compositions in iron meteorites
G.-J. Ding, L.R. Kilius, G.C. Wilson, X.-L. Zhao and J.C. Rucklidge 414
In-situ AMS determination of Re–Os isochron in IIA iron meteorites
G.-J. Ding, L.R. Kilius, G.C. Wilson, X.-L. Zhao and J.C. Rucklidge 424

Section XII. Environmental and paleoclimatic studies using AMS ^{14}C

The first trans-Arctic ^{14}C section: comparison of the mean ages of the deep waters in the Eurasian and Canadian basins of the Arctic Ocean
P. Schlosser, B. Kromer, B. Ekwurzel, G. Bönisch, A. McNichol, R. Schneider, K. von Reden, H.G. Östlund and J.H. Swift 431
AMS measurements of the ^{14}C distribution in the Pacific Ocean
K.F. von Reden, A.P. McNichol, J.C. Peden, K.L. Elder, A.R. Gagnon and R.J. Schneider 438
Radiocarbon in marine dissolved organic carbon (DOC)
M. Le Clercq, J. Van der Plicht, H.A.J. Meijer and H.J.W. De Baar 443
^{14}C AMS measurements of the bomb pulse in N- and S-hemisphere tropical trees
J.O. Murphy, E.M. Lawson, D. Fink, M.A.C. Hotchkis, Q. Hua, G.E. Jacobsen, A.M. Smith and C. Tuniz 447
Field variability of carbon isotopes in soil organic carbon
S.W. Leavitt, E.A. Paul, E. Pendall, P.J. Pinter Jr. and B.A. Kimball 451

^{14}C dating of sediment samples
W. Kretschmer, G. Anton, M. Bergmann, E. Finckh, B. Kowalzik, M. Klein, M. Leigart, S. Merz, G. Morgenroth, I. Piringer, H. Küster, R.D. Low and T. Nakamura 455

The 5000-year environmental change and associated human activities at Sokho-nor Lake, Inner Mongolia, P.R. China
Lu Xiangyang, Yuan Baoyin, Guo Zhiyu and Li Kun 460

AMS ^{14}C chronological study of holocene activities in active faults in Japan
T. Nakamura, M. Okamura, K. Shimazaki, T. Nakata, N. Chida, Y. Suzuki, M. Okuno and A. Ikeda 464

AMS radiocarbon dating of the Sakurajima tephra group, Southern Kyushu, Japan
M. Okuno, T. Nakamura, H. Moriwaki and T. Kobayashi 470

Radiocarbon "dating" of individual chemical compounds in atmospheric aerosol: First results comparing direct isotopic and multivariate statistical apportionment of specific polycyclic aromatic hydrocarbons
L.A. Currie, T.I. Eglinton, B.A. Benner Jr. and A. Pearson 475

Section XIII. Applications of AMS to archaeology

AMS ^{14}C dating of lime mortar
J. Heinemeier, H. Jungner, A. Lindroos, Å. Ringbom, T. von Konow and N. Rud 487

Radiocarbon AMS dating of the ancient sites with earliest pottery from the Russian Far East
Y.V. Kuzmin, A.J.T. Jull, Z.S. Lapshina and V.E. Medvedev 496

Textural and in situ analytical constraints on the provenance of smelted and native archaeological copper in the Great Lakes region of Eastern North America
G.C. Wilson, L.A. Pavlish, G.-J. Ding and R.M. Farquhar 498

A problematic source of organic contamination of linen
H.E. Gove, S.J. Mattingly, A.R. David and L.A. Garza-Valdes 504

Section XIV. Negative ions and negative ion sources

New approaches to negative ions: resonant ionization spectroscopy and storage rings
T. Andersen 508

Weakly-bound negative ions studied by laser excitation and AMS
D. Berkovits, S. Ghelberg, O. Heber and M. Paul 515

A negative ion survey; towards the completion of the periodic table of the negative ions
M.-J. Nadeau, M.A. Garwan, X.-L. Zhao and A.E. Litherland 521

A theoretical study of some negative ions of interest to accelerator mass spectrometry
W.P. Wijesundera and A.E. Litherland 527

Carbon anions and dianion clusters
R. Middleton and J. Klein 532

Hybrid ion sources: Radiocarbon measurements from microgram to milligram
C. Bronk Ramsey and R.E.M. Hedges 539

Hold-up and memory effect for carbon in a compact microwave ion source
R.J. Schneider, K.F. von Reden, J.S.C. Wills, W.T. Diamond, R. Lewis, G. Savard and H. Schmeing 546

A compact multi-sample high-intensity negative ion source
W.Z. Gelbart, R.R. Johnson, M. Paul, D. Berkovits, A. Hershkowitz, F. Cifarelli, R.B. Schubank and Y. Shahar 550

A preliminary report on the characteristics of a CO_2 gas ion source MGF-SNICS at NIES-TERRA
Y. Shibata, H. Kume, A. Tanaka, M. Yoneda, Y. Kumamoto, T. Uehiro and M. Morita 554

The AUSTRALIS microbeam ion source
S.H. Sie, T.R. Niklaus and G.F. Suter 558

Section XV. Trace element AMS (TEAMS)

A new accelerator mass spectrometer for trace element analysis at the Naval Research Laboratory
K.S. Grabowski, D.L. Knies, G.K. Hubler and H.A. Enge 566

TEAMS depth profiles in semiconductors
S.A. Datar, S.N. Renfrow, B.N. Guo, J.M. Anthony, Z.Y. Zhao and F.D. McDaniel 571
Accelerator SIMS at PSI/ETH Zurich
R.M. Ender, M. Döbeli, M. Suter and H.-A. Synal 575
Trace-element analysis of mineral grains using accelerator mass spectrometry – from sampling to interpretation
G.C. Wilson, L.R. Kilius, J.C. Rucklidge, G.-J. Ding and X.-L. Zhao 579
Precious metal abundances in selected iron meteorites: in-situ AMS measurements of the six platinum-group elements plus gold
G.C. Wilson, J.C. Rucklidge, L.R. Kilius, G.-J. Ding and R.G. Cresswell 583
1–200 amu tunable Pretzel magnet notch-mass-filter and injector for trace element accelerator mass spectrometry
D.L. Knies, K.S. Grabowski, G.K. Hubler and H.A. Enge 589

Section XVI. Summary of the Conference

Conference summary: Trends in AMS
W. Kutschera 594
